

Help Save the Hedgehog

With hedgehog friendly fencing!

FUN FACT: Never feed hedgehogs milk as they are lactose intolerant!

To find out more ways to save the hedgehog please visit:
www.britishhedgehogs.org.uk

Since the millennium we have **lost a third of all our hedgehogs**. A big part of the reason for this is human activity such as intensive farming, road traffic and hard landscaping.

Hedgehogs now prefer areas in and around small towns and villages rather than farmland. However due to an increase in housing developments and more roads being built there is a **big loss of connectivity between gardens and greenspaces** meaning **hedgehogs are isolated** or having to cross busy roads.

This is where you can contribute to **HELP SAVE THE HEDGEHOG!**

We are offering **1 FREE upgrade to a *Hedgehog Hole Gravelboard*** for every installation using 12" concrete gravelboards

This allows hedgehogs free movement between gardens to forage for food and find their mates so they never have to cross busy roads again!
